1955-62 Competition Cams' High Energy Cams, Lifters & Springs

As the one component in your engine that has the greatest effect on power, torque and mileage, Competition Cams' has designed 2 unique camshafts. They have the 260 & 268 series for 55-62 small block Corvettes. Each camshaft, lifters, and springs are described below.

260 High Energy Cam (Small Block): This cam is perfect for Corvette owners who want more power without affecting driveability. The 260 is very responsive and is an ideal replacement cam in 283/327 engines. The 260 produces up to 10 horsepower over the stock engine and is used on Corvettes with a 3.08 or greater rear axle ratio. Specifications are .446" lift intake and exhaust, 260 degrees duration at .006" lift, 212 degrees duration at .050" lift with 110 degree lobe centers.

268 High Energy Cam (Small Block): This cam is for the high performance enthusiast. The 268 produces up to 15 horsepower over the stock engine. This cam has a slight lobe at idle but does not affect power accessories. The 268 will idle down to 600 RPM and still pull strong past 6,000 RPM. The 268 is an ideal replacement in 327 engines. Specifications are .460" lift intake and exhaust, 268 degrees duration at .006" lift, 218 degrees duration at .050" lift with 110 degree lobe centers.

High Energy Lifters: When installing a new cam, installation of new lifters is a must! Use of old lifters voids the cam warranty.

High Energy Valve Springs: When installing a 260 small block cam, use stock valve springs if they still maintain their like-new pressures. In cases where the stock springs have lost their tension or for all other cam installations, use Competition Cams' High Energy Valve Springs.

Note: Check your state and local laws on emission standards.

* CARB Approved-50 State Legal On 1980 and Earlier Carbureted Engines.

1955-62 Competition Cams' Magnum Roller Tip Rocker Arms

- Dyno Proven 20 Horsepower Gains
- Reduce Valve Stem & Guide Wear

Competition Cams' unique forge-cast roller tip design reduces friction. As a result it has been dyno tested to produce 15-20 horsepower increases and it makes valve stems and guides last longer. Magnum Rockers fit all 55-62 small block engines (1.52 rocker ratio). Each rocker is supplied with a rocker ball and lock nut. Set of 16.

1960-62 Elite Series Valve Covers

- Die Cast Aluminum • Low Profile

These heavy-gauge aluminum valve covers come with a handsome, polished finish for a custom look. The raised fins are accented by a black matte background, then detailed with Allen hex heads that create a two-piece look from a one-piece construction. They are tall enough to clear aluminum rocker arms, yet low enough to clear A/C units and alternator brackets. No oil fill hole, use PVC hole.

1960-62 Ultra-Seal™ Valve Cover Gaskets

- Unique Gasket Material Swells To Control Leaks

Ultra-Seal™ material provides a positive seal through controlled swelling of the gasket once exposed to hot engine oil. The polymers used in Ultra-20™ also insure gaskets will not harden and fall apart like cork gaskets. Gaskets are coated with an easy release material which helps prevent tearing when the valve covers are removed.

600 CFM Performance Carburetor

- Great Combo With "Performer" Intake

Our 600 CFM Carburetor outperforms the stock Carburetors

and provide better mileage. This carburetor works with Corvette stock throttle linkage and transmission kickdown mechanisms. In addition, they have a universal 12 volt electric choke, vacuum/weight operated secondaries, vacuum advance connection, and PCV fitting. These carburetors have a single fuel inlet which requires a new fuel feed line, but the fuel filter and carburetor gasket are included. Use on an Edelbrock manifold requires the purchase of the carburetor base plate listed below. Used for small block application only.

A5964 Carburetor 600 CFM 379.99 ea.

A5761 Base Plate 9.99 ea.

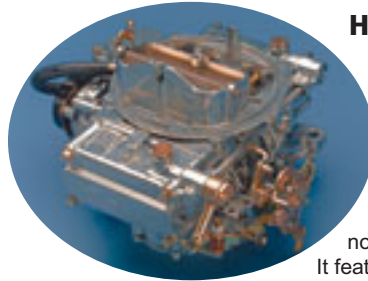

20560 90 Degree Carb Fuel Line Fitting** 16.99 ea.

* EO #D215-10 + Will not work on factory intake manifolds

** Required to clear some air cleaners

Holley Performance Carburetor

- Performance Option For "Performer" Intake Manifold

The Holley 600 CFM performance carburetor is a universal fit carburetor for non-EGR equipped Corvettes.

It features vacuum secondaries, single inlet fuel bowls with side-pivot

floats, adjustable needle and seat, electric choke, PCV and distributor vacuum connections. Not legal for sale or use on pollution controlled vehicles.

A5762 * 379.99 ea.

* Will not work on factory cast iron manifolds

POR-15 Fuel Tank Repair Kit

- Easy To Use
- Ideal For Saving

Metal Tanks With Minor Leaks

The POR-15 Kit outperforms ordinary kits because it is a complete kit that goes to the root of leaks and bonds to the metal whereas other products simply cover the leak. The kit includes TankClean™ to remove gum, sludge and varnish, MetalReady™ to remove rust and prepare the tank for sealer, U.S. standard Tank Sealer™ to permanently seal the tank and Fuel Preservative And Stabilizer to keep fuel fresh and fuel systems trouble-free. The tank must be removed from the car to perform the repair.
