

1955-62 Fidanza Manual Transmission Aluminum Flywheels

- Ideal For Unleashing Your Engine's Full Power (Approximately 25 Horsepower)
- Upgrade Over Stock Flywheel Offering Superior, Replaceable Friction Surface
- Perfect For Spirited Driving Because Flywheel Decelerates Quicker When Disengaged Allowing You To Match Revs Sooner

For years and years savvy tuners and racers have used aluminum flywheels for improved performance. Fidanza's hi-performance 10-13.5 lb. flywheels will give you an instantaneous improvement in performance and is an instant upgrade over your stock flywheel. Fidanza's 6061 T6 billet aluminum flywheels are SFI approved, have a completely replaceable 1050 high carbon alloy steel friction surface and a steel ring gear.

Footnote: Lightweight flywheels are an excellent way to distribute the horsepower that an engine creates more efficiently. Aluminum flywheels will without a doubt add much more performance to your engine. Because factory built flywheels are so heavy it takes an immense amount of power just to get it rotating. To rotate the factory flywheel from 1000 rpm to 6000 rpm can take as much as 40 horsepower. That same application with an aluminum flywheel, because of its lighter weight, takes less than 15 horsepower. This means that the horsepower the engine is saving is actually sent to the wheels and not spent rotating the heavy steel flywheel. If you're wondering about the drawbacks, there are none. With all the benefits of the lightweight flywheel, driveability is virtually unchanged and in most cases improved. Whether the car is your daily driver or a pure race machine, Fidanza flywheels are a great choice.

44662	Small Block w/168 Tooth Flywheel (13.5lbs.)	399.99 ea.
44661	Small Block w/153 Tooth Flywheel (10.5 lbs.)	389.99 ea.

1956-62 Ram Premium Clutch Kits

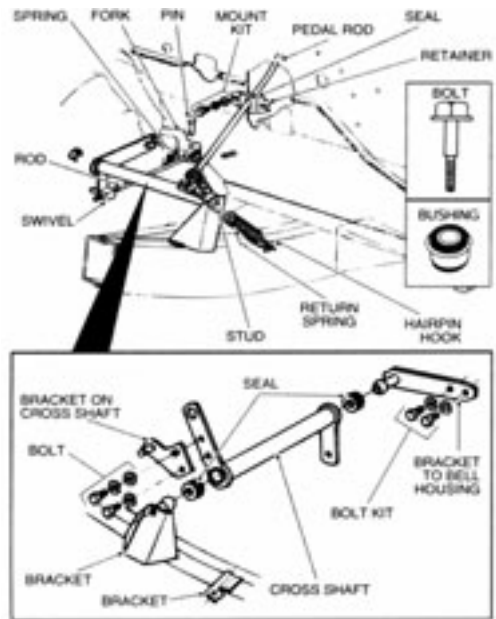

- Upgrade Over Original Equipment
- Pressure Plate, Disc & Throwout Bearing

Clutch Kits are matched pressure plate, clutch

disc and throwout bearing sets that have been designed for engines that have been mechanically upgraded over stock. These sets are direct replacements for stock assemblies and require no additional effort in driving. The additional torque capacity of these clutches is the result of a much improved clutch disc friction material that can withstand the added power output and aggressive driving style of today's mildly modified street combinations. Each set includes a pilot tool to make alignment of the disc a snap.

1962 ACDelco PF172 Automatic Transmission Filter Kit With Powerglide

- Provide Optimum Filtration For Entire Service Interval

ACDelco filters have been engineered to provide maximum filtration for your specific application. ACDelco filters take into consideration all elements of the system so you get not only proper filtration, but the correct air or fluid flow for the period of time specified in your service manual. Using ACDelco filters assures that such key performance parameters as the air/fuel ratio will be kept in perfect balance for optimum performance.
