32164

1955-62 Small Block Aluminum Radiator

- Engine Runs Cooler 20°-40°
- 40% Lighter Than Stock
- Vacuum Braze Assembled (Epoxy Free)

High horsepower engines generate a lot of heat and require extra cooling. Whether you performance drive your Corvette or cruise it, keep its coolant temp in check with this direct fit, high capacity aluminum radiator. It features a cast aluminum filler neck, extra strong tanks and advanced core technology. Delivering lighter, more durable and cooler operations over brass and steel radiators.

1955-60 Direct-Fit Replacement Aluminum Radiator

- Cools Better Than Stock Radiator/Brass Radiator
- Direct Replacement For GM #3133689 & 3141674 Radiators
- Bolt-On Installation

This direct replacement radiator features 2 rows of cooling for as much as 100% additional cooling surface and it has press formed aluminum end tanks that are tig welded to the core for a permanent seal. The core of this aluminum replacement is furnace brazed which provides a leak-free core without the use of epoxy. Painted black this radiator will be mistaken for the original brass/copper radiator that come in your Corvette from factory.

- Air Conditioning Only

The Gen IV™ from Vintage Air is the most powerful and intelligent climate control system. Gen IV systems utilize our exclusive fully electronic microprocessor control servomotor drives to eliminate cables or vacuum connections. Separate high capacity copper parallel-flow heat coil and aluminum plate and fin cooling coils provide outstanding performance and instant temperature adjustments. This new Corvette SureFit™ system includes a three individual rotary controls and factory style knobs that install in the stock dash location. Additional features include variable blower speed and dash/floor/defrost blend. SureFit™ Systems are engineered specifically for each vehicle application and require minimal alteration to the vehicle for installation.
