### 1958-62 Ididit Steering Columns

**NEW**

- Works With Original Or Aftermarket Steering Wheels
- Installation Kit Is Required

Due to lack of space in front of the dash this column is only available in a straight version. The original under-dash mount will be used and you will be required to fabricate your own floor mount. There is a solid shaft that extends from inside the gearbox to the steering wheel. This shaft will need to be cut and modified to fit a coupler. Your original wheel or an aftermarket wheel can be used. Although, a new adapter will be required.
